

# THE PAEDIATRICIANS ROLE IN CHILDHOOD OBESITY PREVENTION

## Purpose of this Web-cast

MAY 28, 2008

The serious nature of the obesity epidemic has been well documented in Canada and around the world. Of grave concern is the epidemic that exists in children and the notion that this generation of parents might outlive their children.

Obesity is much easier to prevent than treat. The Paediatrician plays a pivotal role in prevention.

The Canadian Council of Food and Nutrition (CCFN), Program in Food Safety, Nutrition and Regulatory Affairs (PFSNRA) and Canadian Obesity Network (CON) have coordinated efforts on the topic of childhood obesity prevention.

## Web-cast Program

The event will be launched on May 28, 2008 at 1:00pm EST with presentations on the following topics followed an active roundtable discussion.
